

#1 QUESTION TO KULONGOSKI:

3 facts
33 1

Oregon has over 34 thousand farms and ranches,
generating six billion ^{up to} dollars in export economic activity
~~alone~~ ^{alone} in 1981. In that same year, one billion dollars
in Oregon personal income came ^{directly or indirectly.} from agriculture. ~~half~~
~~of that to people not directly associated with agriculture.~~

Mr. Kulongoski, as an Oregon Legislator you have
established an incredible record of voting against
agriculture.

In fact, you are rated by the Oregon Farm Bureau
as the next to the worst Oregon Legislator on issues
important to this vital part of Oregon life.

If you are interested in economic development,
then why are you such a poor supporter of this ^{historically} important
economic area for our state?

#2 QUESTION TO KULONGOSKI:

Because of
Due to a national economic recession, Oregon has had four special sessions to balance the state's budget since 1979. In *all four bal budt special at time of crisis* each of those sessions, I as governor ~~have~~ developed proposals, announced them publicly, and fought for their passage.

As a State Senator in the majority party, you had the same opportunity and chose not to take the lead.

Now as both a State Senator and candidate for Governor you chose during this most recent special session to once again remain silent, except to vote no on the package which passed both houses.

~~Why have you failed to make any proposals to balance the state's budget in the past?~~

Tell us now,

What was your plan to balance the budget ~~this time?~~

And why haven't we heard *from you* about ~~it?~~

Ballot Measure #3

1. FACT--both candidates oppose Ballot Measure #3.

- It unfairly penalizes some areas of the state.
- It would destroy the Veteran's bond program. ✓

2. BRIDGE--to the Atiyeh limitation.

- "I strongly support a strict form of a property tax limitation. . . .I have introduced such a limitation in the Legislature. . . .I worked to get it on the ballot through the initiative process."

3. How will you deal with it should it pass?

- "I will fight to have my limitation, which is just as strict, substituted."
- FACT--There is no money in the kitty to pay out to local governments.

4. Why did you not agree to serve as co-chairman of the anti-measure 3 committee?

----"I was asked to serve as 'honorary' chairman only. To me this 'honorary' role is not as important as actively campaigning against this measure."

5. In 1978, you said you were going to vote for the property tax limitation on the ballot at that time and then "clean it up". Now you say you didn't vote for that measure. Which of your statements is true and can you clean up this limitation?

----First, I am actively opposed to Measure 3, second, I strongly favor a fair form of a limitation, and finally, my personal vote four years ago is not the issue. My consistent position on this matter has not changed.

Financing Government in the Future

\$500 mil

*Index w/H
Pers Inc Tax*

1. A large number of one-time financing laws will automatically sunset during the next budget period. This will mean a loss of hundred's of million's of dollars in state revenue. As Governor what will you do about this?

*Gov keeps
promises*

--"I strongly support the sunseting of these one time revenue measures. It would be a break of our promise to Oregonians to change any of the sunset provisions."

--"We will deal this change in revenues just as we always have. We will get by with less, we will run government a lean as possible."

2. As governor you will be asked to submit a budget in January 1983. What is you plan for that budget, what are your priorities?

FACTS:

5.5

3

*INDEX
w/H
INCR PERS INC TAX*

--"Unlike my opponent I have a record on budgets. If you want to know what I will do just look at what has been done:

- state spending reduced significantly,
- the welfare system reformed saving \$5.5 million every month,
- *3,400* fewer state employees.

--"With available funds my priorities include: economic development, higher education, and prison space."

3. In the 1978 campaign you attacked your opponent for "obscene" increases in state spending. Now as Governor you have the same record. How do you explain that?

--"As Governor I have brought about the first real cuts in state spending in twenty years. When you look at state general fund spending in real inflation adjusted dollars (the same way each of us has to look at our personal budgets) there has been a dramatic decrease in state spending under my administration."

--"By the way Mr. Kulongoski has not been supportive of these cuts"

CRIME

4 Major Components of Governor's August Crime Plan

1. A constitutional amendment to reinstate capital punishment.
2. Repeal insanity as a defense for violent crime.
3. Double current level of funding for criminal investigation unit of Oregon State Police. (Can be done with existing resources.)
4. Highest priority for capital building money is to budget money to build more jail cells for criminals, this before any other state buildings are built.

CRIME RECORD

- Fought for prison bonding measure to build more cells.
- Went to court when a federal judge tried to tell Oregon how to run our prisons.

Oregon Coastal Fisheries

1. Things are tough on the Oregon coast. It seems like there are lots of fish, yet the seasons are the shortest ever. What can be done?

--"This is not a new issue. I have said for years it is time to stop fighting over what is left and begin to build up the resource."

--"As Governor I have been working to build up this important resource:

- o In 1981 we began the STEP program (the Salmon-Trout Enhancement Program) to both increase the number of fish and increase general public involvement in the project.

These streamside hatching boxes hatched over 4-million salmon eggs in just a two year period.

- o We secured funds to remodel and expand hatchery facilities in Oregon to increase overall production.
- o An increase of over 27 million fingerling salmon over the regular program for the last 3 years, to help rehabilitate wild fish runs.
- o My 1981-83 budget included over ½ million dollars for habitat improvement to increase the natural production of trout and salmon."

--"Finally I must say that I will not support policies which endanger this critical resource. We need to know as much as possible about this resource as possible, and set appropriate seasons."
